Health Research Methods Course: Workshop Proposals

WORKSHOP PROPOSAL SUBMISSION DEADLINE: Monday December 19, 2011 at 5:00pm

****IMPORTANT:** Please ensure that you have read the requirements on this page before submitting your proposal.

For the first time, the Health Research Methods Course is soliciting three-hour workshop proposals on innovative methodology that will contribute to our 2012 theme “Foundations for Innovations in Health Research Methods.”

Workshop proposals will be reviewed on the basis of the following criteria:

- novelty / innovation / creativity of methods to be highlighted
- quality of the interactive workshop format

Successful workshops will be allocated a three hour (with break) concurrent session throughout the two-day conference period, Thursday May 3 and Friday May 4, 2012.

Workshop Proposal Requirements

1. Title
2. Presenter(s) and affiliation (multiple presenters welcome)
3. 50 word description for the program brochure
4. Workshop objectives
5. Outline of activities over the three-hour period
6. Mechanism used to engage attendees
7. Methodological skills that attendees will gain

Format

- 500 word maximum for submission, 12 point, Times New Roman font, MS Word file
- Structured format according to above requirements.

Other considerations

1. Methodological workshops that have been previously offered are welcome.
2. Please list any special resource needs, e.g., computer stations for attendees.
3. Consider the target audience--generally staff working in the provincial health services sector who have limited training in health research.
4. Workshop presenters are responsible for covering their cost of the course registration.

Notification of workshop proposal status will be sent on or before February 1, 2012. Send proposal via email to Dr. Lynn McIntyre, Planning Committee Member, at lmcintyr@ucalgary.ca
