

The Association of Faculties of Medicine of Canada (AFMC) Standing Committee on Continuing Medical Education (SCCME) advises on and guides the education of medical professionals and their continuing medical education/continuing professional development (CME/CPD) to ensure it is of the highest quality. Over the past several years, the SCCME, which includes representatives from all 17 Canadian medical schools as well as numerous partner organizations, has supported the delivery of online CME/CPD for physicians. It has worked to enhance the university CME web portal as a source of relevant online CME/CPD. It has also supported the ongoing development of the MDcme web portal (supported by a consortium of all 17 medical schools and led by Memorial University).

To ensure that the online CME/CPD being provided adequately meet the needs of physicians, the SCCME is conducting a needs assessment and need your feedback. The survey is available online and will take only 5 minutes of your time to complete. All information gathered will be kept confidential. Please click on the following link to access the survey.
